PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with a strong foundation in Data Structures and Algorithms using Java. Experienced in building ETL data pipelines, Retrieval-Augmented Generation (RAG) systems, computer vision applications, and interactive analytics dashboards. Skilled in Python, SQL, machine learning, NLP, computer vision, and modern AI frameworks, with experience translating technical requirements into practical software solutions.

EDUCATION

GLA University

Bachelor of Technology in Computer Science (AI, ML & IoT) | CGPA: 7.12

Mathura, India

Expected June 2027

Vishnu Bhagwan Public School

Intermediate (XII) | Aggregate: 74%

Prayagraj, India

May 2023

St. Xavier's School

High School (X) | Aggregate: 78%

Ballia, India

May 2021

EXPERIENCE

LawSaathi (DharmLaw Solutions Pvt Ltd)

Data Analyst Intern

Remote / Hybrid

March 2026 – June 2026 | [View Offer Letter](#)

- Engineered robust ETL (Extract, Transform, Load) pipelines using Python and SQL to automate the collection, cleaning, and preprocessing of 10,000+ daily data records, reducing manual data processing time by 30%.
- Collaborated with cross-functional engineering and product teams to translate complex data into actionable insights, generating 4 comprehensive monthly reports that supported 5+ strategic platform enhancements.
- Developed interactive data visualizations and dashboards using Streamlit, contributing to a 25% improvement in data pipeline efficiency and a 15% increase in reporting accuracy.
- Maintained data governance and security practices while handling proprietary legal information across internal analytical processes with zero reported compliance breaches.

TECHNICAL SKILLS

Languages: Java (Data Structures & Algorithms), Python, SQL

AI, ML & NLP: Machine Learning, NLP, Computer Vision, Deep Learning, Generative AI

Libraries & Frameworks: Pandas, Numpy, Matplotlib, ChromaDB, Hugging Face, Llama 3, OpenCV

Tools & Platforms: Git/GitHub, Jupyter, Google Colab, VS Code, Streamlit, Microsoft Azure

TECHNICAL PROJECTS

Bastian at the Bottom RAG AI Assistant | Python, ChromaDB, Llama 3, Streamlit

[View Project](#)

- Developed a hybrid Retrieval-Augmented Generation (RAG) AI assistant combining ChromaDB vector search and BM25 keyword retrieval to identify relevant context for response generation.
- Architected a dual-LLM pipeline using Groq's Llama 3.1 8B and Llama 3.3 70B models with cross-encoder reranking for context-aware response generation.
- Deployed an interactive Streamlit dashboard with real-time pipeline monitoring and modular document ingestion components.

Rehab AI | Python, Computer Vision, OpenCV, PyTorch

[View Project](#)

- Engineered an AI-powered physical therapy platform using computer vision to analyze rehabilitation exercises and detect incorrect user posture.
- Integrated movement tracking and real-time corrective feedback algorithms to improve exercise accuracy and safety during home recovery sessions.
- Designed an intuitive frontend interface enabling patients to perform guided, data-driven physiotherapy exercises without requiring continuous in-person supervision.

CERTIFICATIONS

- Microsoft Azure AI Fundamentals (AI-900)
- Machine Learning – Internshala
- Advanced Python – Infosys Springboard
- Data Analyst – SkillCred

CO-CURRICULAR ACTIVITIES

- Participated in a university-level Hackathon at GLA University (March 2025), collaborating with a team to develop software solutions under strict time constraints.
